Global navigation

- Logo/name links home. No separate Home link needed.
- Primary nav order: Writing, Projects, Now, About, Contact.
- Do not add Listening to the nav in v1. Keep it as a home/About feature until there is enough content.
- Use a subtle active underline in Blueprint Blue or Soft Iris.
- On mobile: collapse to a simple Menu button.

Home page wire

- Hero: positioning headline, support copy, two CTAs, social links, Wayfinder illustration.
- What this site is: short curator statement + North note.
- Featured essay spotlight: one signature essay, North map, Substack CTA.
- Latest writing: 3-4 cards, all link to Substack.
- Featured projects: 1 hero project + small proof bullets.
- Listening trail: one playlist card, not a full music archive.
- Now: four small pulse cards - Building, Writing, Reading, Listening.
- Usefulness pillars: product marketing judgment, AI fluency, strategic storytelling, cultural pattern recognition.
- Contact CTA and footer.

Now

About

Contact

I explore how AI, product marketing, and culture shape the future of go-to-market work.

I write, build small AI experiments, and translate complex technology into stories people can understand and use.

• Practical experimentation

• Cultural taste

• Editorial, not corporate

WHAT THIS SITE IS

A curated home for my writing, experiments, projects, and cultural notes at the intersection of AI, product marketing, and practical strategy.

NORTH'S NOTE

This site connects the thinking, building, and taste behind Darwin's work.

FEATURED ESSAY

ESSAY SPOTLIGHT

Lessons from Music for Product Marketing

From Bowie to Black Flag: reinvention, community, and product stories.

What product marketers can learn from musicians and scenes that built movements, not just campaigns.

CultureGTMStorytellingBranding

READ FULL ESSAY ON SUBSTACK

NORTH'S MAP OF THIS ESSAY

PJ HARVEY

Reinvention is a strategy. Treat every launch as a deliberate new chapter.

GRATEFUL DEAD

Build belonging, not just attention.

FUGAZI

Let principles become the brand system.

RADIOHEAD

Make the launch itself part of the story.

BLACK FLAG / SST

Build the ecosystem, not just the campaign.

* Make people live inside the story. That's how movements start.

FEATURED PROJECTS

VIEW ALL PROJECTS

FEATURED PROJECT

music-crewai

A CrewAI project that turns any music genre into a multi-file research report, saved per topic and viewable in a Gradio UI.

What this proves: I don't just write about AI. I build practical workflows that turn curiosity into structured output.

PythonCrewAIGradioLLMs

Question → Research

→ Write → Package → Explore

Built to automate deep research and make it explorable.

Open source. Always iterating.

LISTENING TRAIL

VIEW ALL PLAYLISTS

Post-Punk / Shoegaze / Goth / Dream Pop

A focus playlist for deep work, late nights, and long walks.

Open on Spotify

Use this as production direction for design, content, and front-end implementation.

Writing page wire

- Purpose: curate Substack without duplicating it.
- Hero: Ideas, experiments, and field notes.
- Primary CTA: Read on Substack. Secondary CTA: Subscribe.
- Main list: essay cards with image, date, title, subtitle, summary, tags, and Read on Substack.
- Sidebar: subscribe card, what readers will find, links elsewhere, short quote.
- Do not create categories/sections in v1 beyond simple filters if easy.

Writing page wireframe direction.

Projects page wire

- Purpose: make public GitHub repositories understandable to non-technical visitors.

Use this as production direction for design, content, and front-end implementation.

- Intro column: Ideas in code. Curiosity in motion. North note. Connect links.
- Repository grid: each repo card includes title, description, language, stars/forks if available, and GitHub CTA.
- Each project needs a plain-English explanation of what it proves.
- Bottom CTA: View all on GitHub.

Projects page wireframe direction.

About page wire

- Purpose: direction, not autobiography overload.
- Hero: I explore the intersection of AI, product marketing, and culture to build what is useful.
- Thesis block: Technology is accelerating. Judgment is scarce.
- Care chips: AI that augments judgment, GTM clarity, communities, culture, building in public, learning/sharing.
- Path row: marketing to product, curiosity about AI, builder mindset, writer lens.
- Current exploration + Cultural inputs.
- Final CTA: meaningful conversations.

ABOUT

I explore the intersection of AI, product marketing, and culture to build what's useful.

I'm a product marketing leader and builder who writes, experiments with AI, and pays attention to the patterns that shape how products, people, and ideas spread.

Curious by nature

I ask why, connect dots, and look for leverage.

Builder at heart

I prototype, automate, and ship small things.

Writer always

I turn complexity into stories people get.

My working thesis

Technology is accelerating. Judgment is scarce. The future belongs to those who can combine AI, strategy, and storytelling to create clarity and drive impact.

What I care about

AI that augments human potential

GTM strategy that creates clarity

Communities and movements

Culture, music, and ideas

Building in public

Learning and sharing

My path

From marketing to product

Years leading product marketing and GTM in enterprise SaaS — clarifying positioning, messaging, and launches that drive growth.

Curiosity about AI

Obsessed with how AI works and how it can be applied to real-world problems, not just hype cycles.

Builder mindset

I learn by doing. Small projects, automation, and agents help me test ideas and ship useful tools.

Writer's lens

I write to think, to teach, and to connect. Long-form essays are my way of making sense of the future.

What I'm exploring now

- Building AI agents and workflows that improve GTM work
- The future of product marketing in an AI-native world
- How story, culture, and community drive product adoption
- Systems thinking, automation, and leverage
- Shipping more, overthinking less

North says: Always be shipping. The map gets clearer in motion.

Beyond work

Music, books, and cultural movements are where I go to recalibrate. They teach me about timing, identity, and what makes ideas stick.

Recently listening

Post-Punk / Shoegaze / Goth / Dream Pop

A focus playlist for deep work, late nights, and long walks. The soundtracks behind ideas, essays, and experiments.
